Zic2 Patterns Binocular Vision by Specifying the Uncrossed Retinal Projection

In the September 5 issue of *Cell* (2003), in this article (Vol. 114, pp. 545–557), in Figure 7B, the y axis in both histograms was incorrectly labeled. It should be noted that the error bars indicate standard deviation, rather than standard error, as is currently labeled on the y axis of both histograms. The stated p values are correct.
